RESEARCH REPORTING SERIES

Research reports of the Office of Research and Development, U.S. Environmental Protection Agency, have been grouped into nine series. These nine broad categories were established to facilitate further development and application of environmental technology. Elimination of traditional grouping was consciously planned to foster technology transfer and a maximum interface in related fields. The nine series are:

1. Environmental Health Effects Research
2. Environmental Protection Technology
3. Ecological Research
4. Environmental Monitoring
5. Socioeconomic Environmental Studies
6. Scientific and Technical Assessment Reports (STAR)
7. Interagency Energy-Environment Research and Development
8. "Special" Reports
9. Miscellaneous Reports

This report has been assigned to the MISCELLANEOUS REPORTS series. This series is reserved for reports whose content does not fit into one of the other specific series. Conference proceedings, annual reports, and bibliographies are examples of miscellaneous reports.

EPA REVIEW NOTICE

This report has been reviewed by the U.S. Environmental Protection Agency, and approved for publication. Approval does not signify that the contents necessarily reflect the views and policy of the Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

This document is available to the public through the National Technical Information Service, Springfield, Virginia 22161.

16. ABSTRACT

The report, a bibliography, lists published articles authored by the staff of the four Laboratories comprising EPA's Environmental Research Center, Research Triangle Park, NC. These are the Environmental Monitoring Systems Laboratory, the Environmental Sciences Research Laboratory, the Health Effects Research Laboratory, and the Industrial Environmental Research Laboratory. The Bibliography, inclusive for the period January 1971 - December 1979, includes some citations predating EPA's creation (December 1970). The Bibliography consists of a Key Word-in-Context Index, an Author Index, and a Publication Citations section.

PREFACE

This publication lists the published articles by the staff of the Environmental Protection Agency's Environmental Research Center, Research Triangle Park, North Carolina. EPA conducts its research program through the Office of Research and Development which, in turn maintains 15 research Laboratories throughout the United States. Four of these Laboratories comprise the Environmental Research Center - Research Triangle Park, North Carolina:

– Health Effects Research Laboratory	(HER)
– Environmental Sciences Research Laboratory	(ESR)
– Environmental Monitoring Systems Laboratory	(EMS)
– Industrial Environmental Research Laboratory	(IER)

This Bibliography is inclusive for the period January 1971 through December 1980, although some citations predating EPA's creation (December, 1970) are included. The Bibliography consists of 3 sections:

KWIC Index	(Key Word-In-Context) – Alphabetical listing of titles by principal (Key) words in the title.
Author Index	Alphabetical listing of titles by author.
Publication Citations	Listing of complete citations by citation code number.

Each title in the KWIC and Author Indices contains an individual citation code number (e.g., EMS 71-00002). These numbers are listed alphabetically and numerically in the Publication Citations section along with the complete citation. The letter portion of the code number refers to the Laboratory in which the article originated. These letter designations and their respective Laboratories are indicated above. The two digits following the three letters indicate the year of publication, (e.g., EMS 71-00002). Code numbers followed by an asterisk (e.g., IER 72-01505*) indicate special ordering information (see below). In the Author Index code numbers followed by a + (e.g., EMS 71-000023+) indicate that the author is the primary author for the citation.

STOP WORDS

A listing of STOP WORDS for the Bibliography appears on page iv. The STOP WORD List is composed of common words that have been "stopped" (omitted) so that they will not appear as Key words. For example, the word "Atmosphere" is stopped and will not be found in the index as a Key word. "Atmospheres" and "Atmospheric", however, are Key words.

ORDERING INFORMATION

Copies of articles published in the open literature may be obtained from local libraries, publishers and authors.

NTIS — Requests for citations containing the term NTIS should be addressed to:

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22161

NTIS sells paper copies and microfiche at various prices. Information on how payment can be made and other ordering information can be obtained by calling 703-557-4650. Orders may be placed directly through that number also.

GPO — Requests for citations containing the term GPO should be addressed to:

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402
Telephone No.: (202) 783-3238

GPO sells paper copies at various prices; GPO does not sell microfiche. Payment must accompany all orders to GPO.

Authors — Requests to authors (for those citation codes containing an *) will be honored as long as supply lasts. Such requests should be addressed to the author in care of his Laboratory. In most cases, requests for reports in the open literature will be better filled by the sources suggested above.

Comments on this Bibliography, its usefulness and format are welcome.
